Re: Dead Creek--Sauget, Cahokia and East St. Louis, Illinois, NPL Listing

Dear Coordinator:

I am concerned for the health of my family and our community. We urge you to put Dead Creek Sites 1 and 2 on the National Priority List so that the hazardous and toxic waste in East St. Louis, Sauget and Cahokia will be cleaned up and removed from the floodplain and that those companies and individuals responsible for the contamination will be required to pay for the cleanup and removal.

Because we live in the floodplain, we frequently flood. We are concerned that leaving the toxic waste here could cause additional exposure to our families and contribute to the degradation of our communities. We also feel it is environmentally unjust and violates Executive Order 12866.

Many people eat fish caught from the Mississippi River and area creeks and lakes. EPA should not allow their food supply to be poisoned or our water to be further contaminated.

Please list these sites and move quickly to remove the toxins from our communities.

Sincerely,

Signature
